

FRIGIDAIRE REFRIGERATOR

Apartment model AT-44

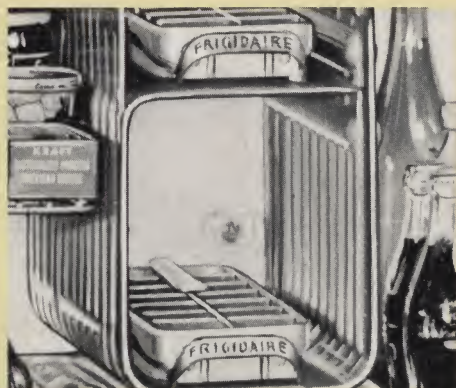

BUILT AND BACKED

BY GENERAL MOTORS

Apartment model AT-44 FRIGIDAIRE REFRIGERATOR

color and convenience for small kitchens... with brilliant new Colorama styling

Convenient Vertical Super-Freezer

Here's ample room for storing frozen foods—up to 15.7 pounds—at safe, sub-freezing temperatures. Two refrigerated shelves for fast freezing ice cubes, desserts or ice cream. Convenient central location lets you store even tall bottles on either side.

Generous Food Compartment

Maximum food storage capacity in this space-saving food compartment with its cool, colorful interior. Keeps all foods at constant safety zone temperatures. Two spacious full-width shelves—sturdy bar-type—closely spaced to prevent tip-overs. Lift out for easy cleaning.

Double-Easy Quickcube Ice Trays

Two golden Frigidaire Quickcube Trays with "built-in" tray and cube release. Touch the handle... tray slides out! Lift the lever... cubes pop out—trigger-quick, without tugging, prying, sink-splashing! Four pounds of ice—28 large cubes at one freezing.

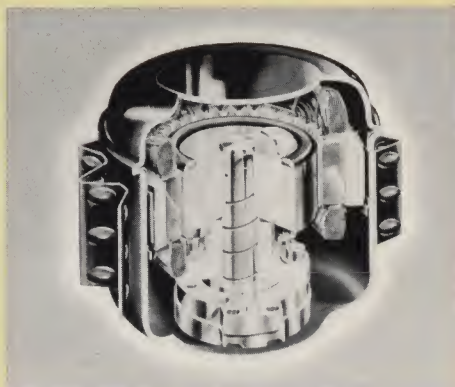

Aluminum Cold Storage Tray

Here is a handy, unbreakable aluminum tray for storing small packages of meat and extra ice cubes—also collects defrost water. 3.7 quart capacity.

Adjustable Cold-Control

Easy to reach—easy to read! Ten positions for regulating temperatures and freezing speed. Semi-automatic Defrost position permits overnight defrosting while still protecting foods in the food compartment.

Famous Frigidaire Meter-Miser

Here's the world-famous Frigidaire Meter-Miser—the simplest refrigerating mechanism ever built. Provides oceans of cold on just a trickle of current. It's permanently sealed-in-steel and oiled for life. Has plenty of reserve capacity for the hottest day.

Compact Apartment Design

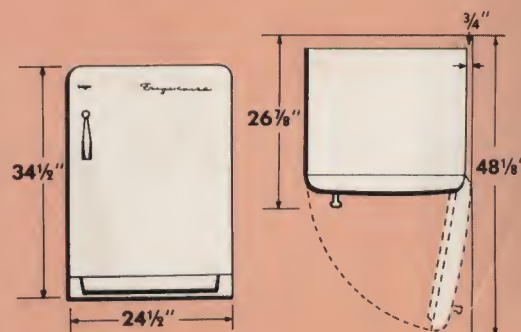

For today's small apartment kitchen or recreation room—Frigidaire answers the food-keeping problem! Special auxiliary, Dulux-finished square top for under-sink or custom installations is available as an accessory to convert to Model AT-44F.
